INDUSTRIAL TRAINING/ INTERNSHIP LETTER

To,
Ashoka Buildcon Pvt. Ltd.,
Nashik - 420003

Subject: Regarding accepting students for internship cum academic project work....

Dear Madam,

Dr. Babasaheb Ambedkar Technological University is the State Technological University established by government of Maharashtra. The University is affiliating type of University which offers Engineering, Architecture, Pharmacy, and Hotel Management and Catering Technology professional courses. The main campus of the University is situated at Lonere, (Raigad). B. Tech., M. Tech. and Ph. D. level courses are offered in various branches of Engineering at the Main campus of the University.

As a part of academic requirement for B. Tech. in Civil Engineering, our Final year students are expected to go through and a complete one-semester internship and Project work in the industry. This will impart exposure to the students to the ongoing live projects undertaken by your organisation and get familiarised with industrial proceedings, professional ethics and dynamics, and inculcate work culture. The internship activity also aims to have mutual knowledge and experience sharing by the industry and academia and will overcome the barriers in information transfer in order to make students industry-ready for the future. At our end it is possible to depute our students during entire even semester of the academic year for full time so as the students can undertake all the activities within the scope of this internship programme and B. Tech. project work. One person from your organisation can be assigned to guide and supervise the work along with the University Department faculty.

The below-listed students of final year B. Tech. Civil Engineering would like to undertake internship and project with your organisation. I must place on record that if we could come up with such a kind of industrial internship programmes and project through it as a practice, it will greatly help the budding engineers. I expect your positive response towards the acceptance of the students. Please issue an acceptance letter in beginning and performance completion certificate at the end of the internship- project work period.

The University is affiliating type of University which offers Engineering, Architecture, Pharmacy, and Hotel Management and Catering Technology professional courses. The main campus of the University is situated at Lonere, (Raigad). B. Tech., M. Tech. and Ph. D. level courses are offered in various branches of Engineering at the Main campus of the University.

As a part of academic requirement for B. Tech. in Civil Engineering, our Final year students are expected to go through and a complete one-semester internship and Project work in the industry. This will impart exposure to the students to the ongoing live projects undertaken by your organisation and get familiarised with industrial proceedings, professional ethics and dynamics, and inculcate work culture. The internship activity also aims to have mutual knowledge and experience sharing by the industry and academia and will overcome the barriers in information transfer in order to make students industry-ready for the future. At our end it is possible to depute our students during entire even semester of the academic year for full time so as the students can undertake all the activities within the scope of this internship programme and B. Tech. project work. One person from your organisation can be assigned to guide and supervise the work along with the University Department faculty.

The below-listed students of final year B. Tech. Civil Engineering would like to undertake internship and project with your organisation. I must place on record that if we could come up with such a kind of industrial internship programmes and project through it as a practice, it will greatly help the budding engineers. I expect your positive response towards the acceptance of the students. Please issue an acceptance letter in beginning and performance completion certificate at the end of the internship- project work period.

INDUSTRIAL TRAINING/ INTERNSHIP LETTER

To,
Mr. Bobby Walia,
Walia & Bros. Organization,
Gondia

Subject: Regarding accepting students for internship cum academic project work....

Dear Madam,

Dr. Babasaheb Ambedkar Technological University is the State Technological University established by government of Maharashtra. The University is affiliating type of University which offers Engineering, Architecture, Pharmacy, and Hotel Management and Catering Technology professional courses. The main campus of the University is situated at Lonere, (Raigad). B. Tech., M. Tech. and Ph. D. level courses are offered in various branches of Engineering at the Main campus of the University.

As a part of academic requirement for B. Tech. in Civil Engineering, our Final year students are expected to go through and a complete one-semester internship and Project work in the industry. This will impart exposure to the students to the ongoing live projects undertaken by your organisation and get familiarised with industrial proceedings, professional ethics and dynamics, and inculcate work culture. The internship activity also aims to have mutual knowledge and experience sharing by the industry and academia and will overcome the barriers in information transfer in order to make students industry-ready for the future. At our end it is possible to depute our students during entire even semester of the academic year for full time so as the students can undertake all the activities within the scope of this internship programme and B. Tech. project work. One person from your organisation can be assigned to guide and supervise the work along with the University Department faculty.

The below-listed students of final year B. Tech. Civil Engineering would like to undertake internship and project with your organisation. I must place on record that if we could come up with such a kind of industrial internship programmes and project through it as a practice, it will greatly help the budding engineers. I expect your positive response towards the acceptance of the students. Please issue an acceptance letter in beginning and performance completion certificate at the end of the internship- project work period.

As a part of academic requirement for B. Tech. in Civil Engineering, our Final year students are expected to go through and a complete one-semester internship and Project work in the industry. This will impart exposure to the students to the ongoing live projects undertaken by your organisation and get familiarised with industrial proceedings, professional ethics and dynamics, and inculcate work culture. The internship activity also aims to have mutual knowledge and experience sharing by the industry and academia and will overcome the barriers in information transfer in order to make students industry-ready for the future. At our end it is possible to depute our students during entire even semester of the academic year for full time so as the students can undertake all the activities within the scope of this internship programme and B. Tech. project work. One person from your organisation can be assigned to guide and supervise the work along with the University Department faculty.

The below-listed students of final year B. Tech. Civil Engineering would like to undertake internship and project with your organisation. I must place on record that if we could come up with such a kind of industrial internship programmes and project through it as a practice, it will greatly help the budding engineers. I expect your positive response towards the acceptance of the students. Please issue an acceptance letter in beginning and performance completion certificate at the end of the internship- project work period.
